

If you value convenience and ease of operation, you'll love our Two-Way Wireless Remotes. The sleek, handheld devices—available in both standard and talking versions—let you control your security system, lights, garage doors and more with the press of a single button. There are no codes to remember!

The Talking Two-Way Wireless Remote actually speaks to you—providing system status feedback in plain-English. It offers an entirely new level of personal protection by allowing you to confirm the status of your security system before entering your home or business.

Both remotes fit easily into purses, pockets and automobile glove compartments and include holders that may be affixed to car visors for easy access. They incorporate four fully programmable buttons with recessed keys—two of which can be pressed in unison for panic situations.

The Two-Way Wireless Remotes are the perfect fit for your active life because it's security that goes with you—letting you enjoy extra mobility without ever compromising your safety or peace of mind.
